DETAILED ACTION

This office action is in response to applicant's amendment filed July 28, 2005.

Information Disclosure Statement

The information disclosure, IDS filed January 18, 2005 was previously considered in part. While the Ahn reference included in the IDS filed January 18 2005 was properly listed, considered and signed as indicated in the previous office action filed March 23, 2005, those references that applicant wanted to bring to examiner's attention was not considered. Because these references fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Likewise the IDS filed June 26, 2003 was considered in part. While the U.S. and foreign references were initialed and considered, because the IDS failed to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each non-patent literature publication or that portion which caused it to be listed; and all other information or that

Art Unit: 2813

portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

CLAIMS

Cancel claims 62-66 and 82.

Election

Claims 47, 67 and 76 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 51-54, 56-59, 70-75 and 79-81, directed to the species of III is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 47- 61 and 67-81 are allowed.

Art Unit: 2813

The following is an examiner's statement of reasons for allowance: while forming peltier elements on back portions of flip chip are known in the art as evidenced by Sato (JP408031994), the prior art does not disclose or make obvious attaching a peltier to an insulating layer on a back portion of a flip chip with a lead electrically connecting a surface of the peltier element to a back portion of the chip including all the limitations of the independent claim.

In contrast, most notably to Schmidt (U.S. 4,935,864), a peltier element is formed on a semi-conductive layer formed on a back portion of its chip, its electrical lead, 24 extends from a surface of the peltier element, but is disclosed as thermally coupled to a back portion of a chip through its sensor, 82; no disclosure or motivation is provided for forming the peltier on an insulating layer and electrically coupling a back portion of its chip in the manner claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art discloses the use of peltier elements on the back surface of flip chips.
